
CC600 Cardboard Corner Cutter (Mate of grooving machine)

The paperboard cutting machine is the best solution to cooperate with the Grooving machine. In the past, the corner removal of the grooving machine was a pain point in the industry. It must go through the die-cutting process first, which increased the process and cost.

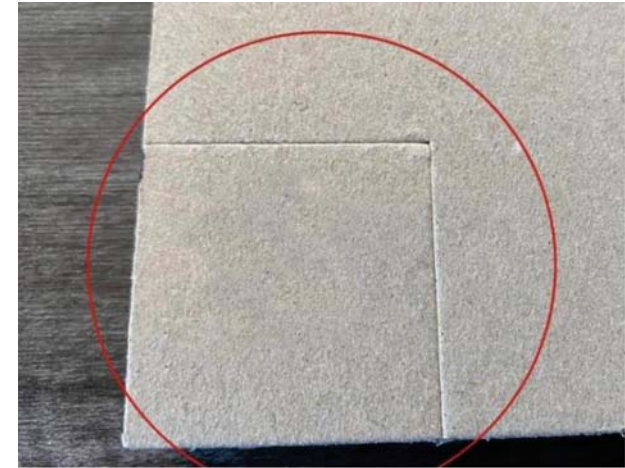

Features:

1. This machine can replace the die-cutting process of paperboard before grooving.
2. Servo motors make the size setting in short time (20 seconds)
3. Optional: receiving conveyor belt(600x1500mm)

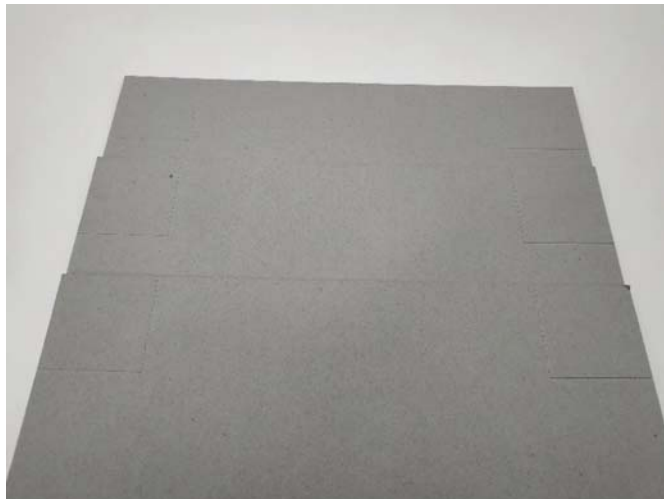

Main technical parameter:

Cutting Length	10-120mm
Cutting gap	$\geq 65\text{mm}$
Cutting Precision	$\pm 0.5\text{mm}$
Cutting speed	80-200Pcs/min
Precision	$\pm 0.1\text{mm}$
Cardboard Min Size	130 \times 130mm
Cardboard Max Size	600 \times 600mm
Machine weight	500kg
Machine dimension	2000x1200x1300mm (conveyor belt not included)

The cutting depth is adjustable, which can replace the die-cutting machine, saving time and labor.
